South Africa

Boilermaker – South32

Wessels Mine, Northern Cape (Ref. 783075)

The purpose of this role is to safely develop, cut fabricate/assemble, weld and maintain metal components and structures. You will develop and fabricate from complex drawings, mark off basic regular engineering shapes, cut drill and punch, assemble and mechanically join structural steel work, cut materials using the oxy-fuel gas cutting process (manual cutting) and hand tools (cold chisel and tin snips), grind steel by means of pedestal/bench grinding machines and perform general grinding operations. You will also assemble and mechanically join sheet, plate, tube, pipe and steel sections, form and shape sheet metal using hand or power-operated machines, perform heat treatment processes on engineering metals, prepare and secure work pieces for welding as well as weld mild steel by means of oxy-acetylene equipment and work pieces in the stainless steel material group using the gas metal arc welding process in all positions. Further responsibilities include shaft examination, removing material with the shields metal arc gouging process, installing fabricated equipment in the plant/mine by means of welding, repairing equipment and components in the plant/mine and removing fabricated equipment in both the plant/mine and mobile machine by means of cutting or gouging.

Serious contenders will have an N2 Technical Certificate (internal candidate)/N3 Technical Certificate/Grade 12 with Mathematics and Science together with a recognised Welder/Plater Trade Test with a minimum of 3 years' experience as a qualified boilermaker in a mining environment. Onsetter's Certificate will be advantageous, while a valid Code B (08) driver's licence and knowledge of SAP are essential.

Mining Trainer – Hotazel Manganese Mines – South32

Mamatwan Mine, Northern Cape (Ref. 783064)

The purpose of the position is to plan and conduct training facilitation, assessments and declare competency to empower employees and meet organisational objectives. In addition, you will plan and facilitate classroom training, conduct planned task observations and training verifications, on-the-job coaching of operators and supervisors, moderation of assessments, relevant assessments and declare competency as well as follow up and make recommendations on 40-hour training. Reviewing and developing/updating relevant learning materials, advising line managers and employees regarding training-related matters and implementing and managing individual projects will also fall to you. You will also advise and provide guidance to line regarding training legislation, coach and advise line on integrated HRD aspects.

Serious contenders will have an Occupational Certificate in Mining Engineering with a minimum of 2 years' experience in training. Assessor or Facilitator Certificate is essential.
